

Project: TB SoundBlaster
Lead Developer: Derek Temple
Lead Designer: Biak Sang

Project Objective:

TB Soundblaster will use the Tinsong API to allow users to search for music by artist, album, or song.

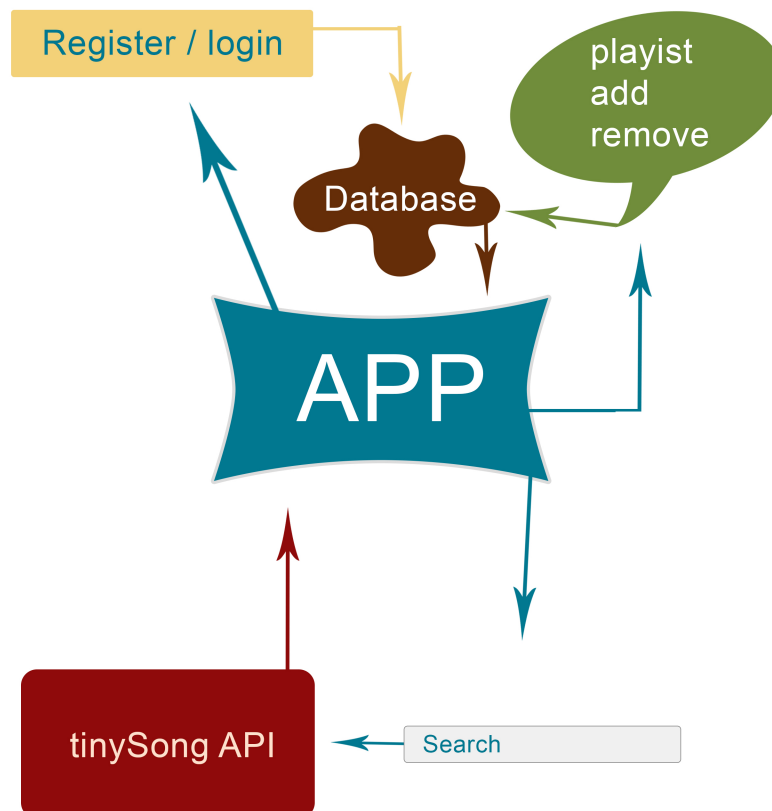

The user will then be able to stream songs, look up lyrics, and view information about the song, album, and artist.

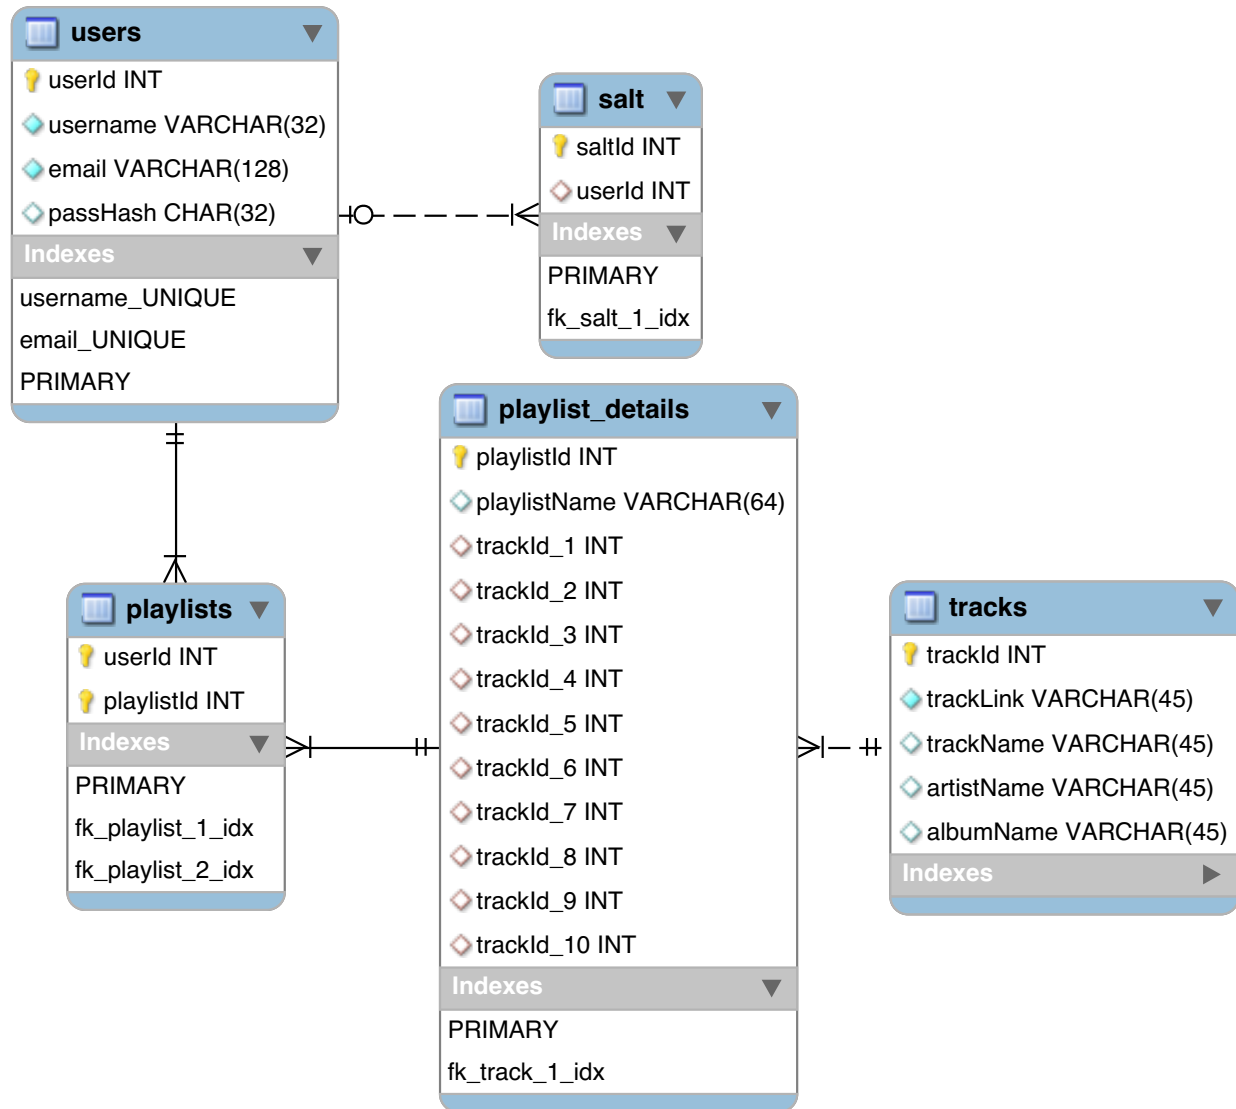

Version 1:

- Search by Artist, Album, and/or Song
- Audio Streaming (TinySong API)
- Display Data for Artist, Album, and Song (TinySong API)
- Playlist Creation

Version 2:

- Display Album Art (MusicBrainz API)
- Lyrics (LyricWiki API)
- Music Video Embedding/Linking (YouTube API)
