

alyssa nicoll

a blog of epic proportions

Why is this blog epic, you might be wondering ...

Because! It is made in Ruby on Rails with Mongo

and Mongoid! What a great combination! Blog

Posts will include author, title, date, category, and

content. Each blog will have comments attached

and stored in the same document inside Mongo.

So prepare yourself kids! Here comes the hootin-

est Tootinest blog you have ever used! Yeeha!

features

users - login/logout , register, sessions

blog posts - title, author, date, category, content

comments - same Mongo document as posts
